

Empowering Generosity. Advancing Care Close to Home.

Each year, the Lake of the Woods District Hospital Foundation invests in priority medical equipment and technology that enhance patient care at Lake of the Woods District Hospital. During the past fiscal year, LWDHF invested \$4,339,950 in new and replacement capital medical equipment, made possible through the combined support of annual donors and the Beyond the Scan Campaign. Together, these investments are transforming care close to home by ensuring our hospital has access to leading-edge equipment and technology when and where it is needed most.

Who We Are

The Lake of the Woods District Hospital Foundation (LWDHF) inspires generosity to advance healthcare close to home. In partnership with donors, businesses, service clubs, healthcare professionals, and community members, we raise funds to support the priority medical equipment, technology, and facility needs of LWDH.

While government funding supports hospital operations, essential capital equipment and technology rely on community support. Every gift helps ensure patients and families across Kenora District have access to exceptional care, when and where they need it most.

Our Community Cares

3,728 Gifts

1,354 Donors

1,100 Volunteer Hours
